Solutions Overview

Inrico delivers a convergent communications solution in line with the way you work.

PoC Portable

PoC Mobile

Convergent Gateway

iConvNet

Dispatch

LMR

ⓘ **Inrico DR10** helps to create a hybrid network, bridging PoC with LMR. It also extends the range of LMR radios.

The iConvNet's convergent solution integrates both the mobile application and dispatch system, working seamlessly together.

iConvNet Core Server

A cloud-based gateway for iConvNet's entire communications. It delivers voice, data, video, PSTN/SIP interconnectivity, AI analysis and other features via public and private 3G, 4G, 5G or WiFi networks.

iConvNet Dispatch

iConvNet Dispatch is a versatile, multi-functional dispatch solution that supports rich communications and more. It is software designed for installation on PCs, but also allows access through a web browser, making it flexible and accessible for various operational needs.

iConvNet Mobile Application

This can be installed on Android, iOS, Linux and RTOS operating systems to enable communications between professional terminals (PoC radios, Smartphones, etc). The mobile application brings clear, stable, and reliable audio and video communications.

Challenges

Effective communication is vital for every business, where quick, secure, and reliable connections can make all the difference. **Here are some key communication challenges businesses face, and the Inrico solutions needed to address them.**

Reliability

In the high-stakes world of business, reliability isn't just a feature—it's a lifeline. Imagine an officer trying to relay crucial information during a crisis, only to face communication failure. That's why a mission-critical system like Inrico is essential, ensuring stable and reliable communication when every second counts.

Coverage

When your business is not confined to one area; spanning cities, rural areas, and even challenging terrains like mountains, your communication system must provide reliable coverage across all these scenarios to ensure constant connectivity. Inrico's core capability is to deliver the nationwide reach you need.

Security

Security in communications goes beyond just locking doors—it's about safeguarding sensitive information. For example, imagine if unauthorized access to your communication lines compromised a business operation. Secure systems with encryption and authentication like iConvNet are non-negotiable to prevent such breaches.

Interoperability

Different teams often use various communication technologies. Imagine coordinating an emergency response with local law enforcement, but your systems can't communicate. Interoperability is key, as Inrico allows different systems to work seamlessly together for a unified, effective response.

Rich Media Transmissions

In today's digital age, voice communication is just the beginning. Picture a security team responding to an incident with real-time video feeds, images, and location data at their fingertips. The ability to transmit rich media is crucial for situational awareness and swift, informed decision-making.
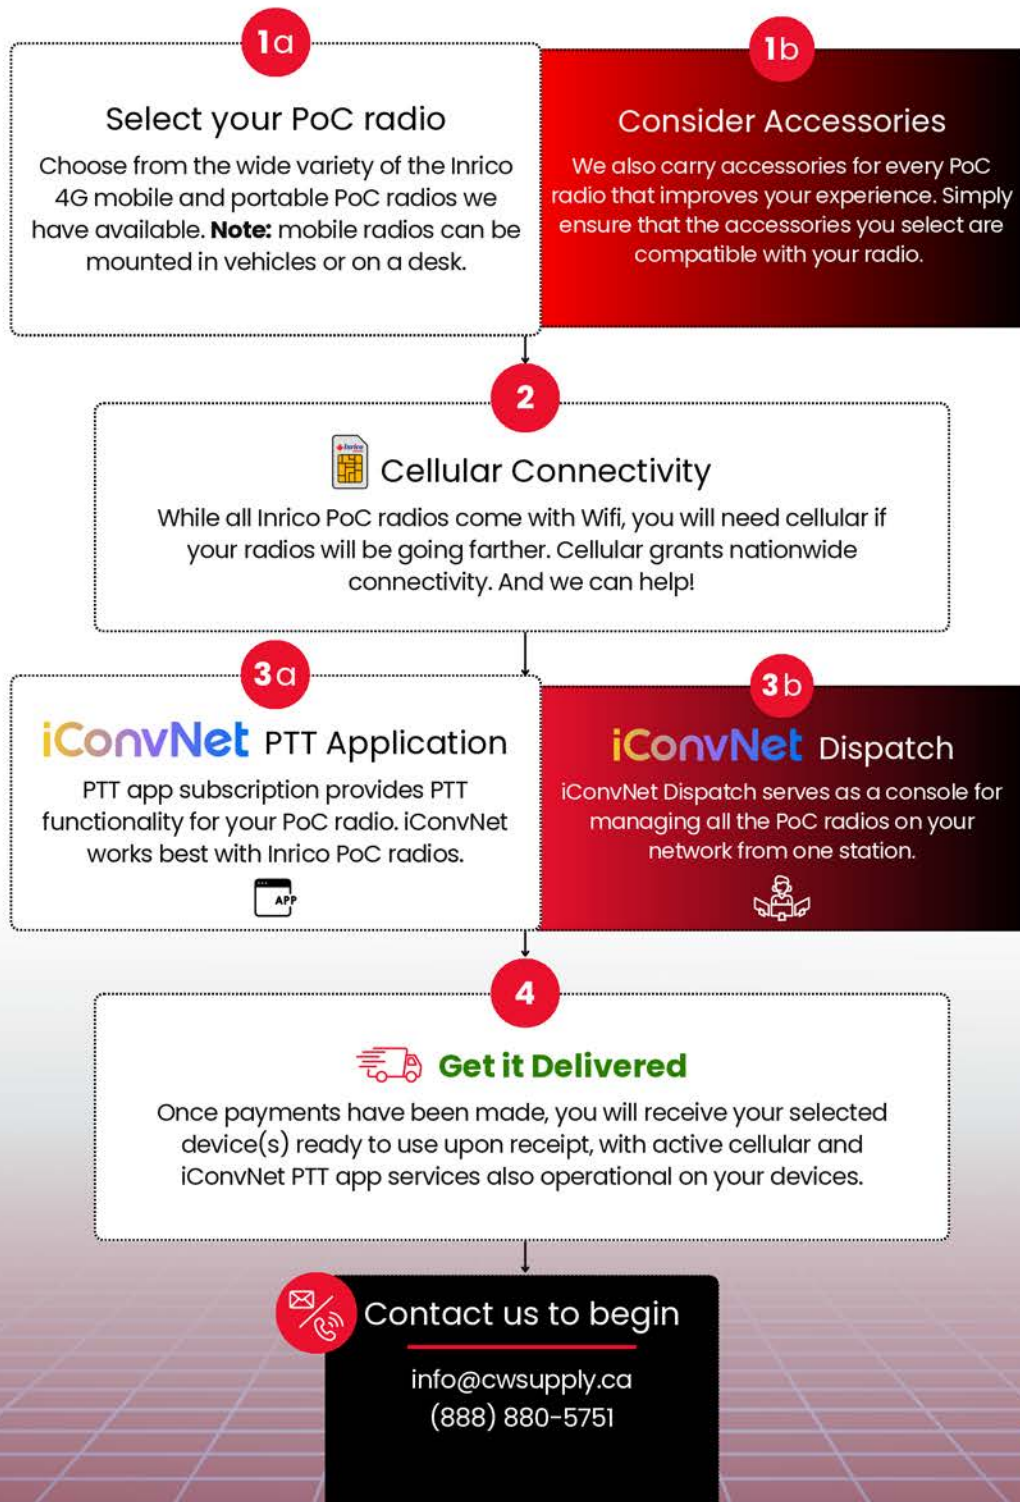

Expandability

The future of security is always evolving. As your operations grow or new technologies emerge, your communication system must be adaptable. Inrico's scalable system allows for easy upgrades and expansions, ensuring you're always equipped to meet tomorrow's challenges.

All your PoC needs, all from one place.
PoC radios, software, cellular, and more.

STEPS TO GETTING SETUP

1a

Select your PoC radio

Choose from the wide variety of the Inrico 4G mobile and portable PoC radios we have available. **Note:** mobile radios can be mounted in vehicles or on a desk.

1b

Consider Accessories

We also carry accessories for every PoC radio that improves your experience. Simply ensure that the accessories you select are compatible with your radio.

2

Cellular Connectivity

While all Inrico PoC radios come with Wifi, you will need cellular if your radios will be going farther. Cellular grants nationwide connectivity. And we can help!

3a

iConvNet PTT Application

PTT app subscription provides PTT functionality for your PoC radio. iConvNet works best with Inrico PoC radios.

APP

3b

iConvNet Dispatch

iConvNet Dispatch serves as a console for managing all the PoC radios on your network from one station.

4

Get it Delivered

Once payments have been made, you will receive your selected device(s) ready to use upon receipt, with active cellular and iConvNet PTT app services also operational on your devices.

PoC Radio Service Subscriptions

Get nationwide cellular connectivity along with all the iConvNet apps and software for your PoC radio needs.
**Shop with us!**

SERVICES PRICING SUMMARY

iConvNet Bundle	→	**$25/Mo.** or **$225/Yr.**
iConvNet PoC App	→	$10/Mo. or $90/Yr.
PoC Cellular Service	→	$15/Mo. or $135/Yr.
iConvNet Dispatch	→	$10/Mo. or $90/Yr.

All our PoC services are **CONTRACT-FREE**, allowing you to cancel your subscription at any time without penalties.

Cellular Connectivity

Get 500 MB of data for your PoC communications. This allows you to obtain connectivity from anywhere in Canada and the USA. Initially, a SIM card will be provided for your PoC radio(s) after payment.

iConvNet PTT Application

iConvNet is designed for use with Inrico's Android-based PoC radios. While third-party apps can work on Inrico radios, iConvNet is the recommended PTT app, as it ensures full compatibility and optimal use of all the features in an Inrico PoC radio.

iConvNet Dispatch

Dispatch is a software that can be accessed from a PC or web browser. It allows you to view and manage all the PoC radios in your private network, enabling you to communicate intelligently from one unified desktop station. Only one dispatch is necessary for small teams of up to 10 people.

PoC Service **Bundle**

This bundle allows you to make a single payment for both iConvNet PTT app and cellular connectivity at the same time, simplifying billing processes.

Instant, Reliable Communication Anytime, Anywhere.

How Inrico Works: PoC radios, iConvNet PTT App, Dispatch, and CWS Management Platform.

From your dispatch console, you can communicate with frontline team members in a more dynamic and intelligent way.

*For detailed features, see "iConvNet Dispatch Features" on page 7.*

iConvNet Dispatch

Communicates with team members.

Team members using mobile and portable Inrico PoC radios can communicate seamlessly from anywhere in Canada and the USA, supported by a range of advanced communication and safety features.

For a full list of features, see the iConvNet PTT App Features on page 7.
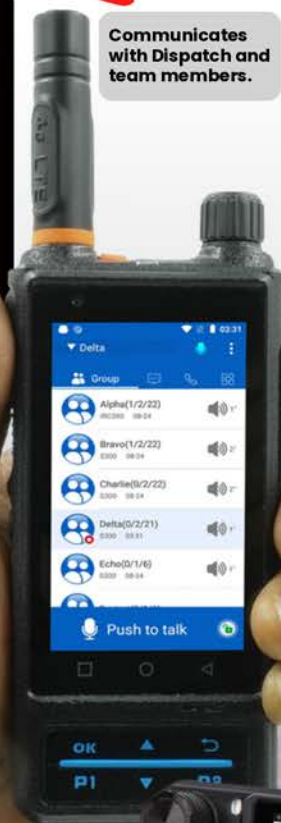

Communicates with Dispatch and team members.

Typical Service Charges: Cellular data + iConvNet (PTT App and Dispatch)

Below is a breakdown of potential charges you can get for our PoC Services Bundle, which includes a subscription for cellular data and the iConvNet PTT app on monthly or 1-year payment plans. Additionally, the table includes pricing for one Dispatch service. *For reference only.*

MONTHLY PLAN

PoC Radios	Cellular Data	iConvNet PTT App	iConvNet Dispatch	Total (Per Month)
2 person team	**$15** x 2 radios	**$10** x 2 radios	*N/A	**$50** + tax
10 person team	**$15** x 10 radios	**$10** x 10 radios	**$10** x 1 PC	**$260** + tax

*This table excludes dispatch for 2 person team, as it is not necessary for such a small team.

✨ 1-YEAR PLAN (GET 3 MONTHS FREE)

PoC Radios	Cellular Data	iConvNet PTT App	iConvNet Dispatch	Total (Per Year)
2 person team	****$15** x 2 radios	****$10** x 2 radios	*N/A	**$450** + tax
10 person team	****$15** x 10 radios	****$10** x 10 radios	****$10** x 1 PC	**$2,340** + tax

*This table excludes dispatch for 2 person team, as it is not necessary for such a small team.
**Get 3 months FREE when you opt for a one-year subscription of cellular data + iConvNet PTT App and Dispatch.

ⓘ

Only one Dispatch station is recommended for up to 10 team members, though you can set up as many Dispatch stations as needed. These tables serves as an example for reference only.
